EXPERIENCE

Lead Product Designer

SwingU

July 2026 - Present

- Sole product designer for a golf rangefinder consumer app within Golf Genius product suite
- Managed designs for a D2C mobile app for golfers across Apple and Android products
- Contributed to product roadmap to define feature priorities for the year
- Mentored multiple junior designers, while maintaining a large workload
- Delivered data-driven experiences for new initiatives and feature updates
- Earned stakeholder trust by promoting quantitative data and user feedback focused designs
- Established product + design process to ensure deliverables were delivered at the highest quality and execution was efficient to avoid re-work post development handoff
- Created the user research process for both consumer app teams (SwingU & Golfshot)
- Conceptualized multiple integration initiatives for additional Golf Genius products
- Used behavioral design to increase user engagement and task completion from 15% to 58%
- Managed design system components and improved components with consistent patterns
- Worked with QA to ensure consistency across watch, phone, and web devices
- Reviewed and iterated designs based off technical feasibility and business tradeoffs
- Delivered user flows, wireframes, interactive prototypes, and high-fidelity visual designs
- Managed 1 designer through discovery, design reviews, and development handoff
- Established Marketing and Content standards
- Led multiple workshops for Marketing campaigns and user journey development
- Produced marketing assets for content creation, pitch decks, and company wide showcases
- Applied WCAG accessibility standards and inclusive design principles to designs

Cofounder/ Product Designer

Dailies

July 2024 - Present

- Product designer for a mobile iOS productivity app with 1 business partner
- Launching product in May 2025
- Received rave product feedback during concept and usability testing
- Responsible for all design and product requirements, business strategy, and development
- Delivered end-to-end discovery, including user personas and user journey maps
- Developed a mobile app with AI prompt engineering and developer feedback
- Defined and packaged all brand and marketing design assets
- Produced final logo designs, concept development, sketches, wireframes, and hi-fidelity pixel perfect design prototypes in Figma
- Monitored horizontal product experience through QA and usability testing of TestFlight environment

Senior Product Designer

Meridian

January 2024 - Present

- Product designer for a pre-seed, fast-paced sports performance startup
- Managed designs for a D2C mobile app for golfers and B2B2C web portal for coaches
- Independently defined complex multi user experiences from concept to completion
- Collaborated with the CEO to refine the product roadmap for a user-centered experience
- Defined tech feasibility and the Jira backlog with the CTO
- Captured user research feedback from coaches and users to inform design updates
- Designed all data visualizations using behavioral design and data design principles
- Increased user task completion from 40% to 85% by implementing quantitative data analysis
- Managed 0-1 design system with systems design principles
- Assessed 100+ design QA needs, improving product quality and visual consistency
- Design QA of the design system identified reusable components and improved its efficiency
- Delivered user flows, wireframes, interactive prototypes, and high-fidelity visual designs
- Managed 4 designers through discovery, design reviews, and development handoff
- Established ux copywriting standards, design documentation, user personas, journey maps
- Produced marketing assets for content creation, pitch decks, and conferences
- Applied WCAG accessibility standards and inclusive design principles to designs through typography, color palettes, layout, audio, content, and language

Product Designer & Senior Product Designer

Method

January 2022 - September 2024

- Product design consultant at a global strategic design agency within the Hitachi ecosystem
- Experience working within B2B, DTC, B2B2C, Internal tools, and SaaS digital product systems
- Measured product success through User Testing with multiple 80+% success rates
- Facilitated weekly legal design reviews and quickly adapted designs for liability requirements
- Founded and managed an internal initiative for over 110 remote employees by fostering community through effective communication and creative problem solving
- Managed stakeholder collaboration sessions and workshops with UCD best practices
- Experience handling comprehensive projects with overlapping objectives and deadlines
- Received yearly peer and client reviews with exceptionally high performance ratings
- Created responsive designs for mobile apps, web apps, tablets, and desktops experiences for financial, healthcare, telecommunications, and diagnostics industries

- Contributed to DesignOps growth initiatives, increasing team efficiency and client trust
- Created and managed a white label design system in Sketch and Figma for a Synchrony Financial consumer product
- Defined user journeys, informational architecture, and user stories
- Proficiency in prototyping to articulate design decisions and interaction flows
- Documented design decisions to ensure transparency and consistency
- Led a team of 3 product designers for a successful Fortune 50 client engagement
- Designed consistent user experiences that aligned with business objectives and user needs
- Improved design collaboration with product and engineering in Agile team environments
- Completed multiple mentorships with two junior designers that secured full-time product roles in 6 months

Product Designer

Penguin Random House

February 2021 - September 2021

- Sole product designer for an internal Marketing consumer insights project
- Responsive redesign of internal company-wide website
- Repurposed & created new design system components for system scalability
- Shipped final designs with successful outcomes and positive reception

Product Designer

Amalgam Rx

October 2020 - August 2021

- Product designer on a 3 member design team at a Series A startup
- Created designs for B2B2C products for patients and healthcare providers
- Designed solutions to manage and teach users about insulin and blood cancer
- Localization for Arabic, Portuguese, Spanish, English, & Italian
- Owned user guide templates for all products
- Owned developer, quality, and regulatory documentation
- Partnered with Lead designer to establish and maintain the white label design system
- Conducted user research interviews with healthcare practitioners to improve their patients app experience
- Created responsive designs for mobile apps, web apps, tablets, and desktops experiences for both Android and iOS systems

Freelance Product Design Consultant

July 2013 - Present
